

SCALABLE SOLUTIONS FOR MANY LOCATIONS

Rollout Services

Canem Rollout Services are used to effectively manage repeatable best practices from simple installations to larger projects for national chains. A rollout project provides rapid delivery in multiple locations with a similar scope.

Canem's Rollout Services

With multiple installations going on in different regions at any one time, the Rollout team serves to ensure that solutions are communicated seamlessly and delivered with maximum efficiency. In turn, clients attain the best possible consistency in their product delivery.

The Canem Approach

Canem has set the standard for best practices with over 50 years of corporate expertise. More specifically, we proactively minimize client business risk by following repeatable best practices including extensive pre-planning, pre-fabrication, logistics, vendor management, and project control methodologies.

→ The top 3 reasons to choose Canem:

1. We minimize your downtime through our speed-to-market methodology
2. We reduce your time spent managing the installations by providing a single point of contact and real-time reporting
3. We optimize your investment by strictly adhering to our quality control procedures

AT THE **CENTRE** OF
BUILDING PERFORMANCE

o Rollout Services

Electrical Contracting · Information Management
Building System Integration · **Green Data Centres** · Energy Management
Security & Risk Management · Lifecycle Services · **Rollouts**

Rollout Services advantages for multi-location customers:

- Single point of contact
- Clear understanding of business processes
- Standards for reporting, billing, response time
- All of our processes are customizable and scalable

Rollout Services Options

Site audits/project-specific surveys

- Built digitally (drop-down boxes, yes/no, fill in the answer)
- Fully exportable to Excel for easy maintenance and comparison
- Available online in real time

At Canem, we pride ourselves on our reputation in being leaders of excellence in the industry.

With over 50 years of experience in electrical and data communications contracting services, Canem Smart Building Technologies has the expertise to deliver a fully integrated set of building systems and services designed to optimize the manageability and maximize the value of building assets.

Canem Smart Building Technologies optimize the performance of a building by integrating the building's technologies with its people and processes. Our technologies provide energy savings and monitoring capabilities, resulting in higher occupancy and increased asset value.
